

Why?

Beware Deceptive Propaganda

True unmanipulated science and logical reasoning, unlike deceptive evolutionary propaganda, compels the conclusion that the earth cannot be billions of years old and that the evolution of life as taught is utterly impossible. (Discussed in detail on the website recommended below. See: Sceptics / Secularism.) This means that for our world to exist it must have had a designer and a manufacturer. Many call this creative source, God. This will spontaneously be rejected and possibly ridiculed by many, which is not a particularly thoughtful reaction.

Reassess Assumptions

Many advancements in our understanding of the universe were initially opposed by those who had established themselves as the leading authorities in the study of those areas. There are many examples of this. Here is just one, as recently as the mid 1800's doctors and nurses rarely washed their hands in-between delivering babies. Improving hygiene in this area was initially treated with contempt by many but the death from infections of both mothers and babies following child birth was seriously reduced after its implementation. We need to take care that we do not make a similar mistake in our own lives. We would suggest that if there is a God it would be wise to take Him seriously. But out of all the religious world views how do we establish which God or gods, if any, are true.

Establish Truth

This is a major problem today. It is not always easy to establish the fundamental facts about a matter when the available information is usually presented with a mass of superimposed opinion of dubious quality. Most people are very cautious about changing a long held opinion, especially their world view. It is very unsettling to discover something we considered true to be false. Nobody has understood everything perfectly so it would be wise to be humble occasionally and be open to discovering any false thinking we may have absorbed.

The Bible

There is a collection of documents that describe the formation of the universe, right through to its destruction, the Bible. There is only one religious leader who demonstrated He came from God by rising from the dead after He was executed, Jesus Christ.

Many have accepted the atheistic propaganda that claims the ancient text of the Bible is completely irrelevant for our 21st century world. This is a seriously flawed belief. The Bible may appear to be a large boring book to many but by reading just one of the four biographies of Jesus Christ (Matthew, Mark, Luke or John) would in just a few hours prove this to be untrue.

Jesus Christ

Despite His **phenomenal** credentials most people do not take the time to seriously consider what Jesus Christ **actually** taught. His teachings were **revolutionary** and changed the world forever. He **was** a real person. Our year is numbered from the date of His birth. He **did** rise from the dead. Hundreds of people saw Him after His resurrection. Power hungry men then tragically tried to institutionalise Him. They corrupted His teachings as they created vain religions instead of promoting the life changing relationship that Jesus Christ wants with **you**.

Many people have discovered a very profound and real relationship with God through Jesus Christ simply by reading the Bible, may we suggest say the Gospel of John. For a deeper dive into the gospel of Jesus Christ we suggest you read the Bible book of Romans.

Our objective is to encourage you to seek a relationship with your creator.
Why not ask Him to reveal Himself to you?

God, if You are there. Please open my eyes to see You.

For a deeper explanation of all these things visit:

Follow Jesus

Visit our website to see how you can discover the awesome fulfilment that comes from having your own personal relationship with Jesus Christ.

For **Sceptics** we explain that when deceptive secular propaganda is unwrapped from true science it leads to the unavoidable conclusion, there is a God.

For those who already have discovered there is a spiritual dimension to life we explain how Satan can appear as an angel of light but all that he actually does is steal, kill and destroy.

For **Seekers** who are searching for the meaning of it all, we explain the uncorrupted Biblical gospel of Jesus Christ. It is good not to get entangled in the corrupted gospels created by men who have tried to institutionalise Him.

For **Newbies** we explain several core teachings of the Bible and much more.
